DETAILED ACTION

1. This communication is in response to applicant's RCE filed on 5/2/2008 and subsequent communication with the Attorney of Record Mr. Agarwal of June 25, 2008 (fax - proposed claims) and June 27, 2008 (telephone authorization for Examiner's Amendment).

Continued Examination Under 37 CFR 1.114

2. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 5/2/08 has been entered.

3. Status of Claims:

Claims 1-34 and 38 are cancelled.

Claims 35-37 and 39-47 are pending and allowed.

Priority

4. It is noted that this application appears to claim subject matter disclosed in prior Application No. PCT/IL98/00563, filed 11/19/1998. A reference to the prior application must be inserted as the first sentence(s) of the specification of this application or in an

application data sheet (37 CFR 1.76), if applicant intends to rely on the filing date of the prior application under 35 U.S.C. 119(e), 120, 121, or 365(c). See 37 CFR 1.78(a). For benefit claims under 35 U.S.C. 120, 121, or 365(c), the reference must include the relationship (i.e., continuation, divisional, or continuation-in-part) of all nonprovisional applications. If the application is a utility or plant application filed under 35 U.S.C. 111(a) on or after November 29, 2000, the specific reference to the prior application must be submitted during the pendency of the application and within the later of four months from the actual filing date of the application or sixteen months from the filing date of the prior application. If the application is a utility or plant application which entered the national stage from an international application filed on or after November 29, 2000, after compliance with 35 U.S.C. 371, the specific reference must be submitted during the pendency of the application and within the later of four months from the date on which the national stage commenced under 35 U.S.C. 371(b) or (f) or sixteen months from the filing date of the prior application. See 37 CFR 1.78(a)(2)(ii) and (a)(5)(ii). This time period is not extendable and a failure to submit the reference required by 35 U.S.C. 119(e) and/or 120, where applicable, within this time period is considered a waiver of any benefit of such prior application(s) under 35 U.S.C. 119(e), 120, 121 and 365(c). A benefit claim filed after the required time period may be accepted if it is accompanied by a grantable petition to accept an unintentionally delayed benefit claim under 35 U.S.C. 119(e), 120, 121 and 365(c). The petition must be accompanied by (1) the reference required by 35 U.S.C. 120 or 119(e) and 37 CFR 1.78(a)(2) or (a)(5) to the prior application (unless previously submitted), (2) a surcharge

under 37 CFR 1.17(t), and (3) a statement that the entire delay between the date the claim was due under 37 CFR 1.78(a)(2) or (a)(5) and the date the claim was filed was unintentional. The Director may require additional information where there is a question whether the delay was unintentional. The petition should be addressed to: Mail Stop Petition, Commissioner for Patents, P.O. Box 1450, Alexandria, Virginia 22313-1450.

If the reference to the prior application was previously submitted within the time period set forth in 37 CFR 1.78(a), but not in the first sentence(s) of the specification or an application data sheet (ADS) as required by 37 CFR 1.78(a) (e.g., if the reference was submitted in an oath or declaration or the application transmittal letter), and the information concerning the benefit claim was recognized by the Office as shown by its inclusion on the first filing receipt, the petition under 37 CFR 1.78(a) and the surcharge under 37 CFR 1.17(t) are not required. Applicant is still required to submit the reference in compliance with 37 CFR 1.78(a) by filing an amendment to the first sentence(s) of the specification or an ADS. See MPEP § 201.11.

Applicant has claimed an improper foreign priority which can be fixed by a petition.

Examiner's Amendment

5. The Examiner's amendment replaces claim 35 and claim 41 with the following amended claims. The amendment is orally authorized by the attorney of record Mr. Dinesh Agarwal subsequent to the faxing of the proposed claims (see the attached fax

from Mr. Agarwal dated 6/25/08 - 4 pages total) on June 27, 2008 (telephonic authorization).

Examiner's Amendment:

-- Claim 35: A method for collecting payments in a distributed digital computerized communication environment for services provided by a third party service provider, comprising the following steps:

a. using digital tokens issued by a second party digital tokens issuer by computerized means, during a digital communication between a user and the second party, while the third party is not part of the digital communication issuing the digital tokens;

b. Acquiring by a user of digital tokens from the digital tokens issuer and storing the digital tokens in a user's token database;

c. canceling the used digital tokens from the user's tokens database, that are being used by the user according to computerized predefined criteria between the user and the digital tokens issuer, when the user uses the service provided by the third party such that there is no exchange of digital tokens between the user and the third party, wherein the digital tokens can be generated by the user himself according to a special and secure digital permit from the digital tokens issuer and according to predefined criteria in different predefined values. --

-- Claim 41: A method for monitoring the proper use, in payment for services provided by a third party, of digital tokens issued by a second arty digital tokens issuer by computerized means, comprising the following steps:

a. engaging a digital communication between a user and second party, where the third party does not take part in the communication and does not participate in any exchange of digital token with the user,

b. The user sends to the second party a report including information relating to the digital token used and canceled by the user while using the service for which a payment by digital tokens was required;

c. The second party maintains a database of previous reports relating to digital tokens used in the past, and the report received in step (b) is added to the database;

d. The second party compares the information received in step (b) with previous reports for the same user;

e. If the comparison detects a violation of the rules for the use of digital tokens, then the second party performs one or more of: stores that information, displays a violation report, reports that to the digital tokens issuer, sends a note to the user of such digital token, wherein the digital tokens can be generated by the user himself according to a special and secure digital permit from the digital tokens issuer and according to predefined criteria in different predefined values. —

Allowable Subject Matter

6. Claims 35-37 and 39-47 are pending and have been allowed.

The following is an examiner's statement of reasons for the indication of allowable subject matter allowance:

Independent claim 35 and claim 41 and their dependent claims 36-37, 39-40 and 42-47 are allowed because the closes prior art records including Hill (US 6,236,981) and Biffar (US 5,903,880) in any combination failed to teach or render obvious to one of ordinary skill in the art the following limitations:

Claim 35 - using digital tokens issued by a second party digital tokens issuer by computerized means, during a digital communication between a user and the second party, while the third party is not part of the digital communication issuing the digital tokens; and wherein the digital tokens can be generated by the user himself according to a special and secure digital permit from the digital tokens issuer and according to predefined criteria in different predefined values.

Claim 41 - engaging a digital communication between a user and the second party, where the third party does not take part in the communication and does not participate in any exchange of digital tokens with the user; and wherein the digital tokens can be generated by the user himself according to a special and secure digital permit from the digital tokens issuer and according to predefined criteria in different predefined values.

NPL - Prior art for record ("Direct purchasing on the Internet" Jack Large. Corporate Finance. London: Mar 1997. , Iss. 148; pg. 38) Large discloses: Electronic cash

payment systems enable the transfer of value with no clearing and settlement required and so are much cheaper to operate. There are two basic types of electronic cash payment system on the Internet: stored-value cards and electronic cash/coin software tokens, and Coming together on smart cards The problem with cyber wallets and electronic cash tokens is that they can be used only on the Internet and only on the specific PC where the consumer's tokens and digital authentication reside. They cannot be used in the outside world and make shopping on the Internet separate and distinct. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
